World Class Precision and Quality

Precision key blanks made of nickel silver have superior physical and mechanical properties with high tensile strength. This type of key blank has a stronger resistance to corrosion and wear, and presents an attractive appearance with its fine silver polish..

Jet's Silver Line meets the accuracy requirements for both master keying and duplication. For the master locksmith who originates new systems or maintains existing systems, using either accurate wheel type cutters or the new punches, all keys will be perfect every time.

The Silver Line key bows are coined, embossed and designed to create the appearance of the originals. They are polished to a fine finish using a special new process. Look for our black, gold and silver key blank box... it's your guarantee of the finest nickel silver key blanks available today.

Smart Clone

CLONES THE UNCLONABLE

With the new JET "Smart Clone" with Crypto Update (SCLONE-CRPT), you can now clone ALL T.I. Crypto transponder keys as well as ALL Fixed Code transponder keys in your shop. Vehicles not required. Older Smart Clones can be upgraded by ordering the Crypto Update (CRYPTO-SW). Keys are also available in assortments: CRB-A (1 ea. of Crypto blades & 3 SCH-2 heads) & SCB-A (1 ea. of all Smart Clone blades & 2 SCH-1 & 3 SCH-2 heads). Optional software (SC-Console) is also available which allows additional functions including manual writing/generation of codes for fixed code transponder keys & customer archiving.

SMART CLONE TRANSPONDER KEY BLANKS

Unique two piece design... The blade of the SMART CLONE Transponder Key separates from the electronic key head so it can be easily replaced in case of damage or miscut.

NGS-XL-CAN FORD TRANSPONDER PROGRAMMER

Ford transponder keys for the year 2007 models, and for all prior years, can now be made without an original key. The NGS-XL-CAN plugs into the vehicle and will create a new key. 5 H72-PHT, 5 H72-PHT-T and 5 H74-PHT Ford transponder keys and 50 H75-NP Ford keys are included with the Jet NGS-XL-CAN.

The NGS-XL-CAN will now come with two VIM's (vehicle interface module). The classic VIM, which uses the green and red software cards for 2004 and earlier models and the purple & orange software cards for 2005 and later models, will perform all the necessary functions on 1996-2006 non-CAN vehicles. The NEW CAN VIM, with an additional blue software card, will perform all the necessary functions on 2003 and later vehicles that use the new link.

KEY TOWER "7001"

The JET Key Tower Display is the perfect way to merchandise your key duplicating service to your customers. The attractive, colorful header towers over 40-inches above the counter, making it easily seen from points throughout your store.

The four-sided rotary key display rack features 342 key blank hooks and allows for quick, easy selection and duplication of key orders. Preprinted location cards slip behind the hook racks for easy placement and retrieval of key blanks, and for effective inventory control. An easily accessed storage door in the tower provides for convenient key blank storage.

The key machine, ordered separately, fits neatly into the base of the display, providing an attractive, self-contained key duplication center. The display's small foot print utilizes only 2 square feet of counter space.
